Du Verre Hardware is proud to introduce OFFSET an outstanding new collection of cabinet hardware designed by award-winning mosaic artist and interior designer, Erin Adams. With her extensive background in mosaic tile and glass design, Adams has put an interesting spin on her love of mosaics and ventured into classic hardware shapes.

Thanks to Du Verre's progressive manufacturing methods, The OFFSET Collection of original knobs and pulls is made entirely from environmentally friendly recycled aluminum. As a result, OFFSET is compatible with LEED objectives.

OFFSET comes in five different sizes and four finishes:  
*Antique Brass, Polished Chrome, Oil Rubbed Bronze and Matte Black.*

Erin Adams grew up in Texas, earned a master's degree at Pratt Institute in Brooklyn and opened an art gallery in Manhattan in the 1980s. She's been a major designer and head of her own company ever since. "I have a need to explore materials, surfaces and patterns," she says, "and I have a compulsion to share my discoveries."

Adams won the Chrysler Corporation Design Innovator Award in 2007 for innovative product design and was recently nominated for the Cooper-Hewitt National Museum's 2009 National Design Awards program for excellence in Product Design.
